## Summary

**AI Technical Project Manager** with 10+ years leading software delivery and deploying AI-enabled workflow solutions across engineering, DevOps, and QA. Proven track record implementing AI automation to improve reporting, QA workflows, and localization—while managing schedules, risks, dependencies, and stakeholder communication in Agile environments. Known for driving adoption through practical tooling and measurable process improvements from build through release.

## EXPERIENCE

### **Scopely, Remote — Sr. Deployment Project Manager | AI Delivery & Software Implementation**

July 2023 - March 2026

- Led enterprise AI initiatives by deploying AI-assisted QA automation and improving AI reporting workflows using Jira and Confluence.
- Drove AI-assisted localization workflows across multiple development teams to speed iteration and improve consistency.
- Coordinated end-to-end AI-enabled software delivery across Engineering, DevOps, QA, Production, Live Ops, and executive stakeholders.
- Produced executive status reports that improved release visibility and risk escalation by clearly tracking blockers, dependencies and delivery progress.
- Mentored project contributions by coaching on delivery best practices to strengthen consistency across teams.

### **Scopely, Remote — Deployment Project Manager | Software Delivery**

February 2021 - July 2023

- Managed the end-to-end software implementation and deployment for live mobile and web applications, ensuring reliable release across concurrent projects.
- Coordinated release schedules across engineering and external partners, including Apple App Store Connect and Google Play Console, to keep launches on track.
- Maintained project plans, schedules, release documentation, and dependencies across multiple initiatives to reduce execution risk and improve delivery predictability.

## **Microsoft - The Initiative, Santa Monica — Associate Producer | Technical Project Coordinator**

December 2018 - September 2020

- Coordinated software development milestones across engineering, design, production, and leadership teams, supporting predictable delivery across teams.
- Built project schedules, tracked risks, and maintained implementation documentation in Jira and Confluence, improving delivery visibility and stakeholder alignment.
- Created Jira workflows that streamlined project tracking, strengthened collaboration, and improved visibility into project status and dependencies.
- Coordinated user research sessions and internal playtest, documenting findings and translating feedback into actionable recommendations that informed product improvements.

## **Lucid Sight, Santa Monica — Producer**

May 2018 - October 2018

- Led cross-functional software development teams delivering mobile and PC applications, aligning execution across engineering, QA and production.
- Managed stakeholder expectations and gathered project feedback, translating input into clear implementation priorities.
- Partnered with engineering and QA teams to resolve delivery issues, protect project schedules, and maintain development momentum.
- Coordinated external vendors while improving communication and operational workflows, strengthening execution across internal and external teams.

## **Deluxe Entertainment, Santa Monica — Associate Producer**

November 2015 - April 2018

- Supported enterprise software delivery across North America, Europe, and APAC, coordinating execution across multiple regions.
- Coordinated localization, publishing, licensing and implementation efforts across multiple technical teams, helping maintain alignment and delivery continuity.
- Partnered with executive leadership to manage priorities, schedules, and milestones, supporting timely decision-making and delivery.
- Assisted with certification, deployment readiness, and technical documentation for console, PC, mobile, and VR platforms, reducing friction during release preparation.
